RUNNING TIMES	
Act 1	0:42:24
Intermission	15
Act 2	0:29:04
Show	1:11:28
Total Elapsed	1:26

### Performance:

1. We had a good show this afternoon.
2. Charlie Clark was out- Liz Maxwell went on as Tweedledum. She did a great job.

### FOH:

House Count: 178

1. We held the curtain a few minutes for the house.
2. It was a fairly quiet house today.
3. There was a group of 20 from Duke Energy in the house- including 13 children. After the show some of the cast came out and met with the kids for a Q & A and photo op.

### Tech:

1. ASM forgot to set the cupcake today. We realized our mistake 10 minutes prior to the show and set it then. We'll take additional steps to prevent this oversight from happening in the future.
2. PROPS: The queen's flamingo mallet lost its crown today during the scene. In between shows Shannon fixed the mallet- and took care of some additional maintenance and repair notes.
3. SCENIC: The gates are now touching at the top when they close. It seems that they might be bending- or the poles are leaning in a bit. Nick took a look at them before the show and made sure the bolts were tight, etc. Richard, on Monday can you give the gates and their support structure a thorough examination? Our concern is that they have more motion in them now when Sara climbs than they used to. And that when they are in the closed position they rub/touch at the top where there used to be clearance. Ultimately I want to know that they are safe beyond a doubt. Nick is a good person to ask for more details as he looked at them today. Thank you.
4. SCENIC: There is a seam on the down stage right corner in the astro turf that's coming loose.

### Distribution
